

ABB → FitNest BNPL Requirements Pack

Values ABB must provide to FitNest for BNPL integration

Partner: FitNest | Product: BNPL | Date: 2026-08-09

1. Mandatory credentials & endpoints

Item	FitNest env key	Expected example / notes
OAuth2 client_id	ABB_BNPL_CLIENT_ID	e.g. partner-xxx-fitnest
Token URL (Test)	ABB_BNPL_AUTH_URL	https://test-id.abb-bank.az/realms/partner/protocol/openid-connect/token
Token URL (Prod)	ABB_BNPL_AUTH_URL	https://id.abb-bank.az/realms/abb-partners/protocol/openid-connect/token
API base URL (Test)	ABB_BNPL_API_BASE_URL	https://api-test.abb-bank.az
API base URL (Prod)	ABB_BNPL_API_BASE_URL	https://api.abb-bank.az
JWT audience (if ≠ token URL)	ABB_BNPL_TOKEN_AUDIENCE	Only if different from auth URL
OAuth scope confirmation	ABB_BNPL_SCOPE	Doc default: openid

2. Confirmations ABB must complete

- FitNest production public key registered for Private Key JWT (RS256).
- FitNest test/development public key registered.
- Public IPs whitelisted: 144.91.105.149 and 144.91.105.138.
- Test callback registered: https://dev-api.fitnest.az/payment/abb/bnpl/callback + FitNest Basic Auth.
- Prod callback registered: https://api.fitnest.az/payment/abb/bnpl/callback + FitNest Basic Auth.

3. Security details still missing in documentation

Item	FitNest env key	Why needed
X-Signature HMAC secret	ABB_BNPL_CALLBACK_HMAC_SECRET	Header documented; algorithm not specified
HMAC algorithm + canonical string	—	e.g. HMAC-SHA256 over raw body / timestamp
ABB outbound IP ranges for callbacks	—	FitNest firewall / WAF allowlist

4. Clarification questions before mobile UX freeze

1. Is there an available-terms API per customer, or only submit-order with term validation errors?
2. After INIT, how is the user directed to ABB Mobile — deep link or manual open?
3. Exact term request format: numeric ("3") vs display ("3 ay")? Meaning of terms 1 and 4?
4. When does an order become EXPIRED?
5. Behavior if the same partner reference is submitted twice?
6. When does COMPLETED transition to CLOSED, and what should the partner do on CLOSED?
7. Is partial reverse required for subscription merchants, or is full reverse enough for MVP?
8. Please provide a test FIN/phone matrix with expected statuses (approve / reject / expire).

5. Test data requested from ABB

Item	Example from doc / request
Test FIN	Doc sample: 67J3LXC (please confirm working set)
Test phone numbers	Matching ABB Mobile test accounts
Expected happy-path status flow	INIT → IN_PROGRESS → COMPLETED
Expected reject / expire scenarios	Documented steps + expected callback payloads

After client_id is received, FitNest will set ABB_BNPL_CLIENT_ID and disable ABB_BNPL_MAINTENANCE_MODE.
